

Custom Subnet Masks

Problem 1

Number of needed subnets **14**
 Number of needed usable hosts **14**
 Network Address **192.10.10.0**

Address class C

Default subnet mask 255 . 255 . 255 . 0

Custom subnet mask 255 . 255 . 255 . 240

Total number of subnets 16

Total number of host addresses 16

Number of usable addresses 14

Number of bits borrowed 4

Show your work for Problem 1 in the space below.

| | 256 | 128 | 64 | 32 | 16 | 8 | 4 | 2 | 1 | Number of Hosts |

The binary value of the last bit borrowed is the range. In this problem the range is 16.

The first address in each subnet range is the subnet number.

The last address in each subnet range is the subnet broadcast address.

Subnetting

Problem 2

Number of needed subnets **1000**

Number of needed usable hosts **60**

Network Address **165.100.0.0**

Address class B

Default subnet mask 255 . 255 . 0 . 0

Custom subnet mask 255 . 255 . 255 . 192

Total number of subnets 1,024

Total number of host addresses 64

Number of usable addresses 62

Number of bits borrowed 10

What is the 15th
subnet range? 165.100.3.128 to 165.100.3.191

What is the subnet number
for the 6th subnet? 165 . 100 . 1 . 64

What is the subnet
broadcast address for
the 6th subnet? 165 . 100 . 1 . 127

What are the assignable
addresses for the 9th
subnet? 165.100.2.1 to 165.100.0.62

Practical Subnetting 1

Based on the information in the graphic shown, design a network addressing scheme that will supply the **minimum number of subnets**, and allow enough extra subnets and hosts for 100% growth in both areas. Circle each subnet on the graphic and answer the questions below.

| | |
|--|----------------------|
| Address class | <u>B</u> |
| Custom subnet mask | <u>255.255.224.0</u> |
| Minimum number of subnets needed | <u>4</u> |
| Extra subnets required for 100% growth (Round up to the next whole number) | <u>+ 4</u> |
| Total number of subnets needed | <u>= 8</u> |
| Number of host addresses in the largest subnet group | <u>60</u> |
| Number of addresses needed for 100% growth in the largest subnet (Round up to the next whole number) | <u>+ 60</u> |
| Total number of address needed for the largest subnet | <u>= 120</u> |

Start with the first subnet and arrange your sub-networks from the largest group to the smallest.

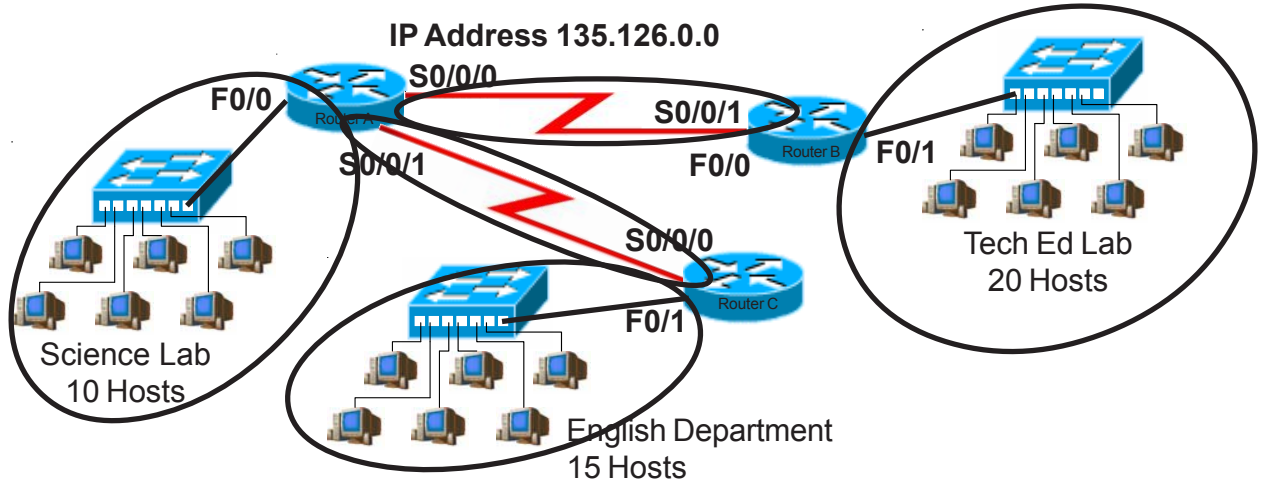

| | |
|--|-----------------------------------|
| IP address range for Research | <u>172.16.0.0 to 172.31.255</u> |
| IP address range for Marketing | <u>172.16.32.0 to 172.63.255</u> |
| IP address range for Management | <u>172.16.64.0 to 172.95.255</u> |
| IP address range for Router A to Router B serial connection | <u>172.16.96.0 to 172.127.255</u> |

Show your work for Practical Subnetting 1 in the space below.

[illegible]

Practical Subnetting 2

Based on the information in the graphic shown, design a network addressing scheme that will supply the **minimum number of hosts per subnet**, and allow enough extra subnets and hosts for 30% growth in all areas. Circle each subnet on the graphic and answer the questions below.

| | |
|---|------------------------|
| Address class | <u>B</u> |
| Custom subnet mask | <u>255.255.255.224</u> |
| Minimum number of subnets needed | <u>5</u> |
| Extra subnets required for 30% growth (Round up to the next whole number) | <u>+ 2</u> |
| Total number of subnets needed | <u>= 7</u> |
| Number of host addresses in the largest subnet group | <u>20</u> |
| Number of addresses needed for 30% growth in the largest subnet (Round up to the next whole number) | <u>+ 6</u> |
| Total number of address needed for the largest subnet | <u>= 26</u> |

Start with the first subnet and arrange your sub-networks from the largest group to the smallest.

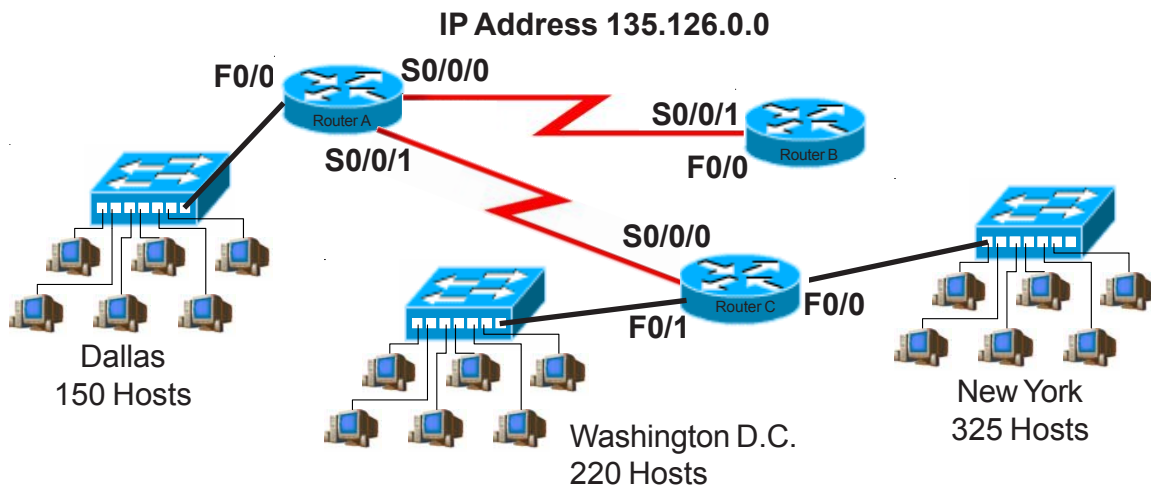

| | |
|--|---------------------------------------|
| IP address range for Tech Ed | <u>135.126.0.0 to 135.126.0.31</u> |
| IP address range for English | <u>135.126.0.32 to 135.126.0.63</u> |
| IP address range for Science | <u>135.126.0.64 to 135.126.0.95</u> |
| IP address range for Router A to Router B serial connection | <u>135.126.0.96 to 135.126.0.127</u> |
| IP address range for Router A to Router C serial connection | <u>135.126.0.128 to 135.126.0.159</u> |

Show your work for Problem 2 in the space below.

Practical Subnetting 4

Based on the information in the graphic shown, design a network addressing scheme that will supply the **minimum number of subnets**, and allow enough extra subnets and hosts for 70% growth in all areas. Circle each subnet on the graphic and answer the questions below.

Address class _____

Custom subnet mask _____

Minimum number of subnets needed _____

Extra subnets required for 70% growth **+** _____
(Round up to the next whole number)

Total number of subnets needed **=** _____

Number of host addresses
in the largest subnet group _____

Number of addresses needed for
70% growth in the largest subnet **+** _____
(Round up to the next whole number)

Total number of address
needed for the largest subnet **=** _____

Start with the first subnet and arrange your sub-networks from the largest group to the smallest.

IP address range for New York _____

IP address range for Washington D. C. _____

IP address range for Dallas _____

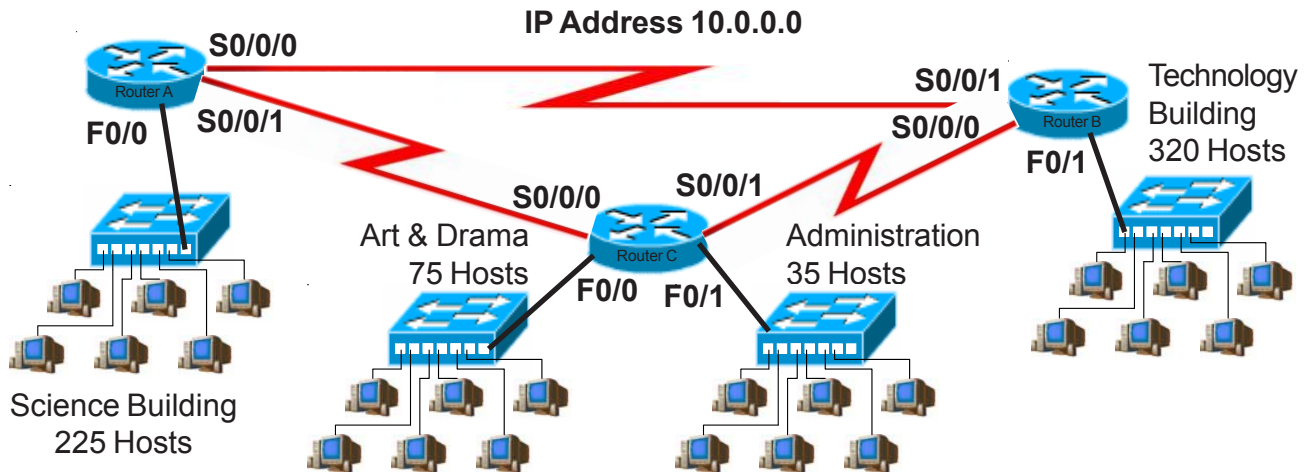

IP address range for Router A
to Router B serial connection _____

IP address range for Router A
to Router C serial connection _____

Show your work for Problem 4 in the space below.

Practical Subnetting 6

Based on the information in the graphic shown, design a network addressing scheme that will supply the **minimum number of subnets**, and allow enough extra subnets and hosts for 20% growth in all areas. Circle each subnet on the graphic and answer the questions below.

Address class _____

Custom subnet mask _____

Minimum number of subnets needed _____

Extra subnets required for 20% growth $+$ _____
(Round up to the next whole number)

Total number of subnets needed $=$ _____

Start with the first subnet and arrange your sub-networks from the largest group to the smallest.

IP address range for Technology _____

IP address range for Science _____

IP address range for Arts & Drama _____

IP Address range Administration _____

IP address range for Router A
to Router B serial connection _____

IP address range for Router A
to Router C serial connection _____

IP address range for Router B
to Router C serial connection _____
